Remuneration & Recruitment Process	8

Founded in 1866, The Denholm Group is a fifth-generation family business. To ensure the continued strength of the Group, each generation has carefully considered the longer-term view of the future. That is why today, The Denholm Group has purposefully evolved into four divisions: Shipping, Logistics, Seafoods and Industrial Services. Through this structure, The Denholm Group is able to manage its risk by having a number of different businesses influenced by various differing factors. Each division originates from shipping or maritime-related services and has developed and expanded its products and services to meet the ever-evolving market influences and customer requirements. This approach benefits all stakeholders, including shareholders, employees, customers, partners, suppliers, and the local communities in which we work.

Overview of The Denholm Group's Four Divisions:

Denholm Shipping

The fleet comprises three ships: two 38,000 deadweight tonne bulk carriers, 'MV Mountpark' and 'MV Glenpark', which were delivered in 2016 and 2017 respectively; and a 37,000-deadweight tonne bulk carrier, 'MV Wellpark', which was built in 2014. The fleet, which sails under the British flag, is commercially managed by Denholm Coates, a London-based subsidiary. The ships are technically managed by Anglo-Eastern from their Hong Kong office.

Denholm Coates is our shipbroking and commercial management business. It focuses on the international dry cargo market covering bulk carriers, multi-purpose vessels and heavy lift ships. Denholm Coates also provides a specialist service to move cable for the telecommunications industry.

The Denholm Group also holds a 26% shareholding in Anglo-Eastern Univan Group, one of the world's largest ship management companies, technically managing over 650 ships from offices around the world.

Denholm Logistics

Denholm Logistics is a division of the Denholm Group, providing regional, national, and global logistics solutions and port services. Serving customers across the UK and Ireland, we leverage our footprint and global network to provide the quality of service that enables our customers to meet their commitments.

Each business within the Denholm Logistics division has an established track record, with a core expertise that has been honed over decades. Their mantra is to provide a consistent and reliable service to customers as their requirements continue to evolve at an accelerating pace.

Denholm Seafoods

Fishing at sea can be tough, challenging work. To help skippers manage their existing boats, or upgrade to more modern, efficient boats – or to help them secure their first fishing vessel – Denholm Fishselling supports fishing businesses and their local communities, including investing in boats and quota, together with the skipper and their family. Currently, Denholm has investments in over 20 fishing companies and partnerships. It also helps skippers market their catch and manage the operational requirements and commercial administration of running a fishing business, as well as supplying chandlery provisions needed to run a fishing boat. In essence, by working with Denholm Fishselling, skippers can focus on their true passion - landing a quality catch.

Denholm Seafoods processes pelagic fish caught from sustainable fisheries in the rich waters of the North East Atlantic. Principally mackerel, herring and the delicacy herring roe are processed at its quayside plant in Peterhead, Europe's largest fishing port. The factory is supplied primarily by the boats that are owned by business partners, who own modern pelagic trawlers. Their customers expect high-quality fish products with full traceability, and Denholm Seafoods consistently meet their expectations by working collaboratively with our fishing partners, combined with stringent quality standards and controls.

Denholm Industrial Services

Adopting the latest in safety and technological innovation, Denholm's industrial service offering includes industrial painting and surface preparation, insulation, scaffolding and specialist access solutions whilst ensuring that all employees and associated third parties work within a safe environment in what are often challenging circumstances.

The division also provides containment and environmental encapsulation to protect civil, industrial, and military structures and assets from the elements. The skills and expertise of its technicians in evaluating the condition of metal and floor surfaces, surface preparation and coating system applications can reduce maintenance periods and improve structural longevity.

Background to Current Opportunity

Denholm Group is looking to appoint an experienced Senior Technical Project Manager. This is a full-time role, to be based in the Liverpool office.

As the business has evolved and grown over the generations, there has been no compromise on a culture of integrity, professionalism, and ambition. With a turnover of c.£400 million and c.1700 employees and diverse divisions, this is a business which offers a fantastic opportunity for a Senior Technical Project Manager to oversee the PMO and lead complex IT projects, whilst creating a culture of best practise across the organisation.

The IT department supports the entire group and is a pivotal part of the Denholm business. With our IT strategy guiding transformation of the organisation, we are looking to strengthen the team and move from a break-fix function, into a strategic partner adding significant value and supporting service delivery.

The Role:

As Senior Technical Project Manager, you will:

- Be responsible for the oversight of our project management office (PMO) and lead complex IT projects
- Ensure projects are delivered on time, within scope, and within budget, while driving continuous improvement in project management practices
- Implement fit for purpose project governance
- Ensure appropriate project reporting for the group

Main Responsibilities:

- The Senior Technical Project Manager will be highly technical with experience of Agile and waterfall lifecycles
- The role will require in depth technical knowledge of programming languages, networks, video conferencing, IT security & business systems

The Individual:

To be successful as Denholm's Senior Technical Project Manager, you will require:

- A minimum of 7 years of experience in IT project management, with at least 3 years in a leadership role
- Possess a PMP, PRINCE2, or equivalent project management certification
- Be experienced and proficient in project management software and tools, such as MS Project, JIRA, or similar
- Have a bachelor's degree in Information Technology, Computer Science, Business Administration, or a related field

In addition to a strong technical skillset, you will require:

- Strong leadership and team management skills
- Excellent verbal and written communication skills
- Strong problem-solving and analytical abilities
- Ability to work effectively with cross-functional teams and senior stakeholders
- Flexibility to adapt to changing business needs and project requirements

This is a fantastic opportunity to join a highly established business, contributing to the organisation's digital transformation and strategy. In return, the successful candidate will receive a competitive salary, information available upon request.
